DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

IN THE CLAIMS:

In claim 19, line 3 after "that", "hold" has been replaced with -- holds --.

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance:

With regard to independent claims 1 and 13, U.S. Patent No. 4,606,535 (Larson) is the closest prior art of record.

With regard to independent claim 1, the Larson patent discloses a paper feed apparatus including a plurality of projections capable of engaging with ends of a plurality of sheets of paper and of projecting from the inclined surface; and a plurality of resilient arm portions that hold the respective projections at respective positions so as to project from a surface of the inclined surface, wherein the arm portions are aligned in at least one row along a conveying direction of the paper. However, Larson fails to disclose or suggest the claimed combination of the inclined surface being provided with an elongated hole formed along the conveying direction of the paper; the plurality of projections projecting from the inclined surface through the elongated hole; and the inclined surface making an obtuse angle relative to the paper stored in the paper storage.

With regard to independent claim 13, the Larson patent discloses a paper separation mechanism including a paper separation unit having a plurality of projections capable of engaging with ends of a plurality of stacked sheets of paper in the paper feed direction; a plurality of resilient arm portions that hold the respective projections at respective positions so as to engage with the ends of the paper; and a base portion that holds the resilient arm portions, wherein the arm portions are aligned in at least one row along a conveying direction of the paper. However, Larson fails to disclose or suggest

the claimed holder unit with an elongated hole formed along the paper feed direction of the paper, wherein the projections of the paper separation unit project upward at a predetermined length through the elongated hole of the holder unit.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
